-

Turn off the power

Remove the power supply plug from the power supply socket.

i-PRO Configuration Tool

Installation of i-PRO Configuration Tool

With a web browser, access the following Panasonic Support Website and go to the download page.

https://security.panasonic.com/training_support/design_tools/iCT/

Follow the procedure described on the download page to download and install the i-PRO Configuration Tool (V1.3 or higher) on your PC.

Note

- The downloaded data includes the instruction manual of the i-PRO Configuration Tool (i-PRO Configuration Tool.pdf). Please read here for the required PC specifications and the basic operation method of the i-PRO Configuration Tool.

- From here, we will explain using the screen of the i-PRO Configuration Tool (some parts may differ from the actual screen).

Launch i-PRO Configuration Tool

Start the i-PRO Configuration Tool.

The 'Register new user' screen is displayed.

Register a new user information to launch this tool.

Username

Password (8 to 32 characters)*

Retype password to confirm.

Show the entered characters for Password as it is.

*For the password, use three or more types of characters from upper case, lower case, numbers, and symbols.
*Set the password which does not include the user name.

Store Administrator name and Password so as not to forget.

When this check box is turned on, it is possible to check whether this tool version and the connected devices are the latest by connecting to the Internet.

Log in

Register the 'Username' and 'Password' only at the first startup after installation.

Click the [Log in] button.

Note

- The 'Register new user' screen opens only at the first startup after installation, and the 'Log in' screen opens from the second time onward.

Log in

Username

Password

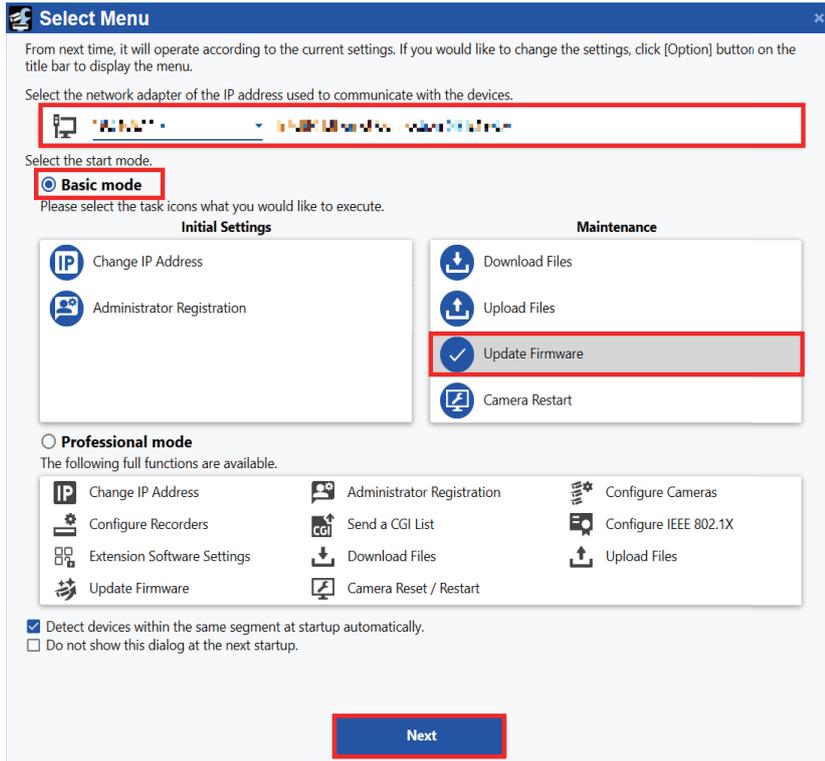

Show the entered characters for Password as it is.

When this check box is turned on, it is possible to check whether this tool version and the connected devices are the latest by connecting to the Internet.

Log in

Firmware update with i-PRO Configuration Tool

When you log in, the 'Select Menu' screen is displayed.

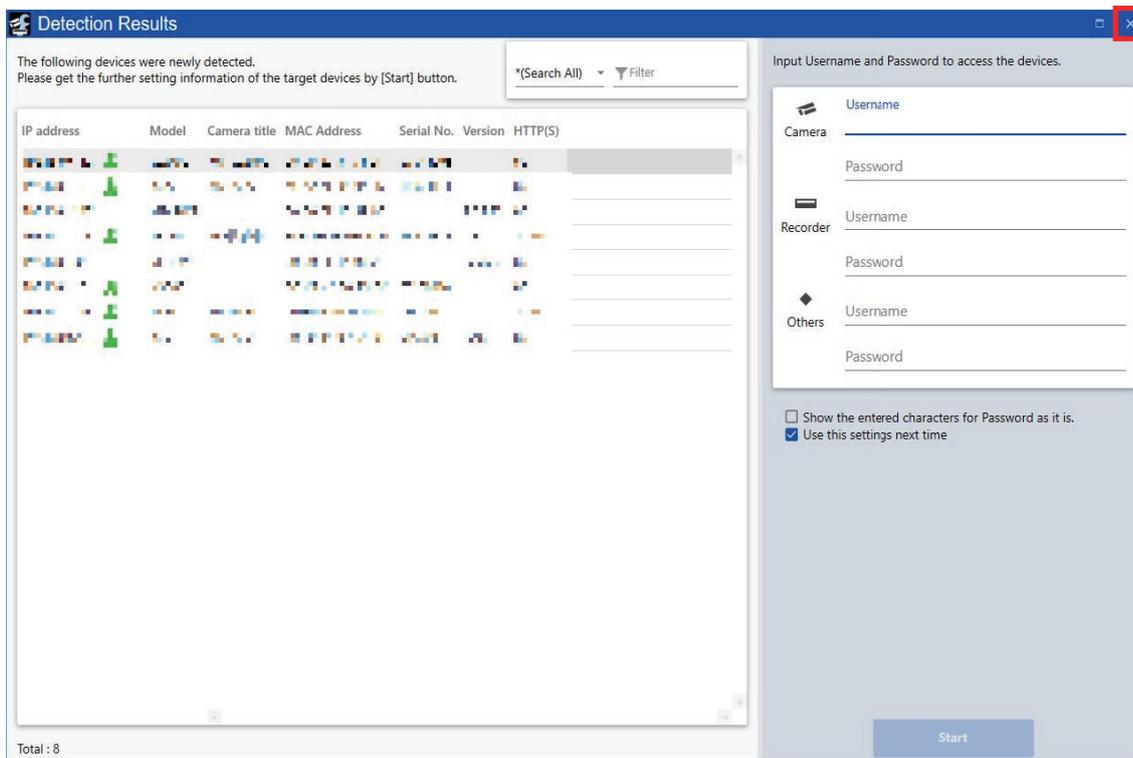

Select the IP address of the network adapter used to communicate with the WV-CU980.

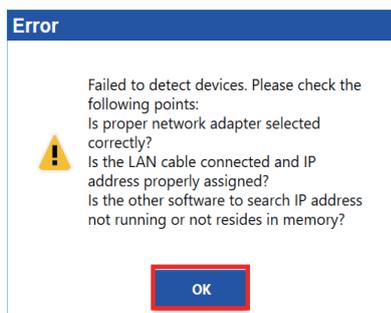

After selecting [Basic mode], check 'Update Firmware' in [Maintenance].

Click the [Next] button.

If the following 'Detection Result' screen is displayed, click the [x] button at the top right of the screen to close the screen.

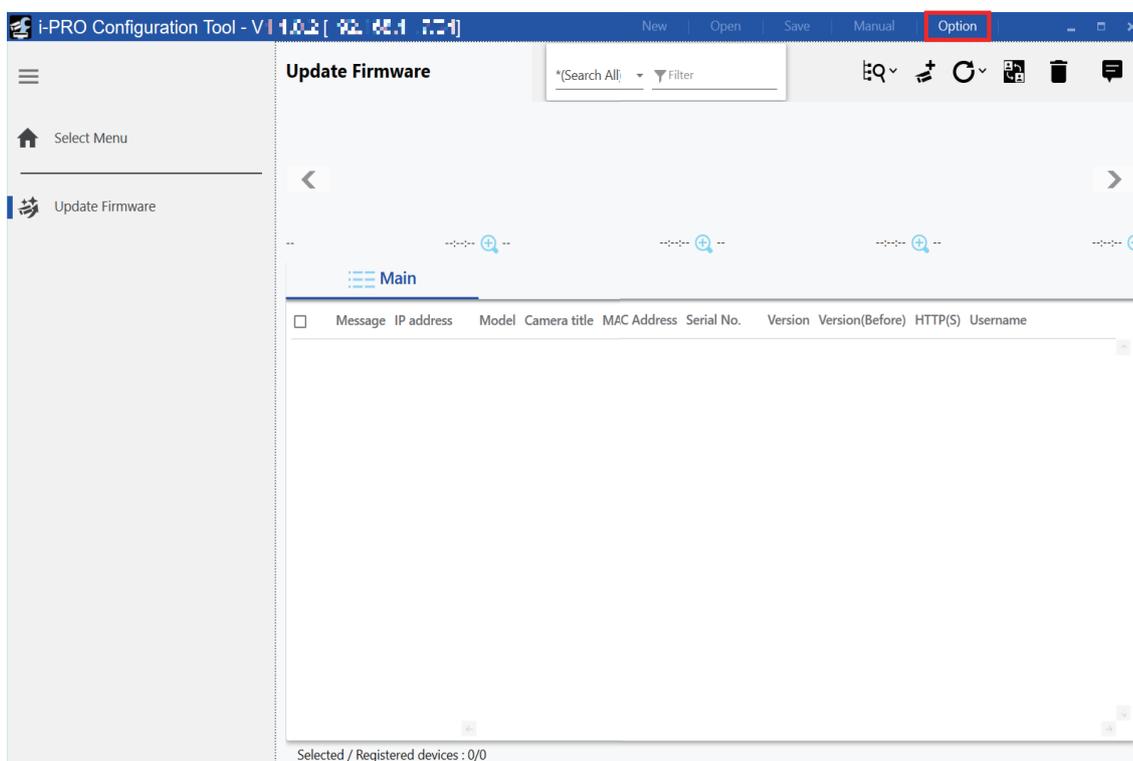

If the following 'Error' screen is displayed, click the [OK] button.

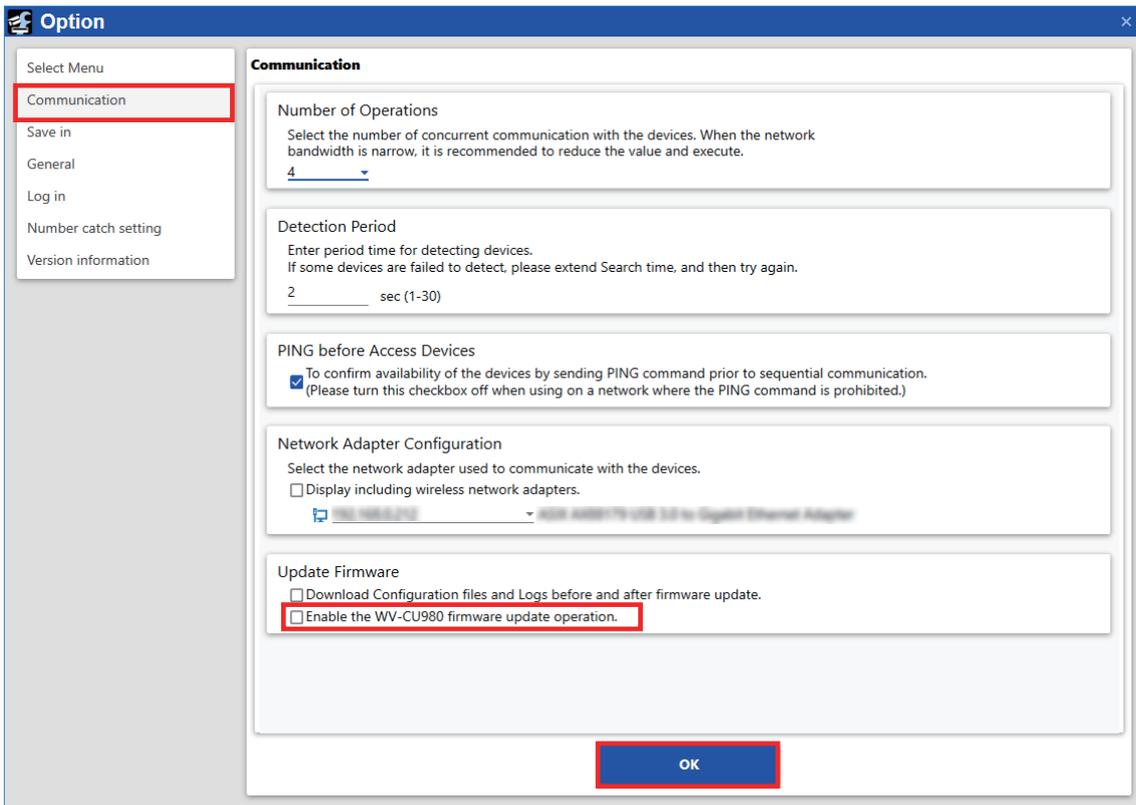

Note

- Where WV-CU980 does not detect the connection with the device, the above error screen may be displayed even if the PC and WV-CU980 are connected correctly.
-

Click the [Option] on the 'Title bar'.

The [Option] screen is displayed.

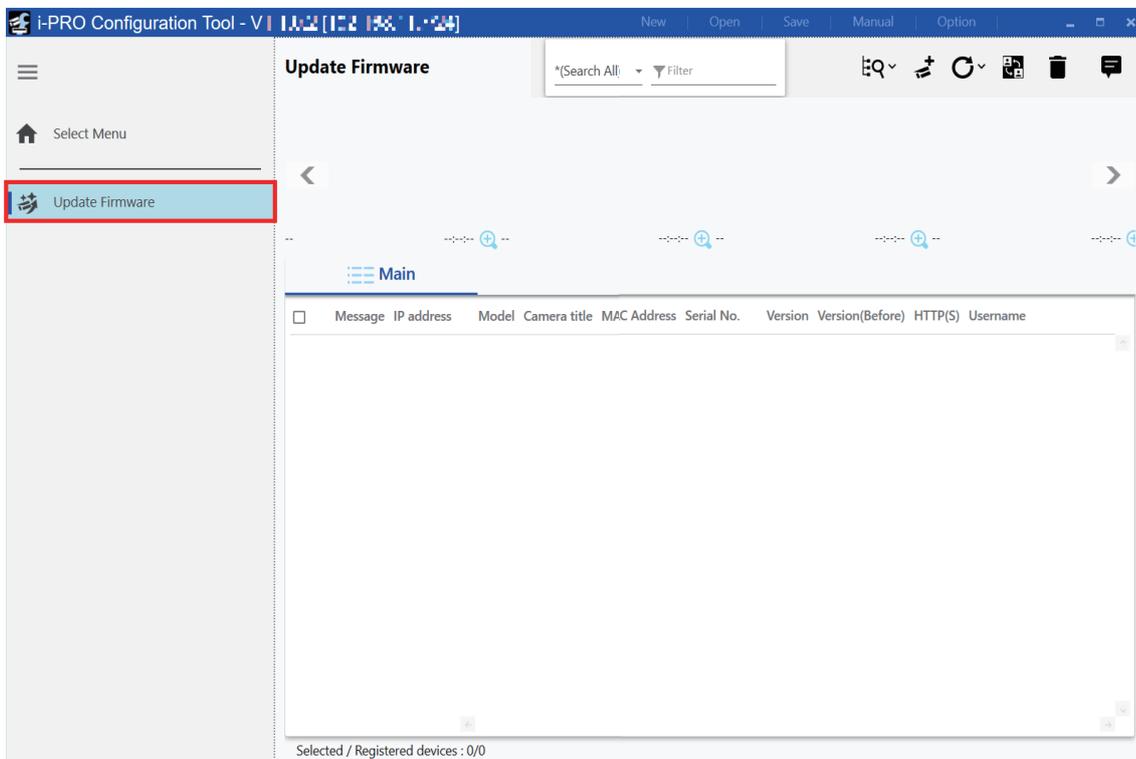

Select the [Communication].

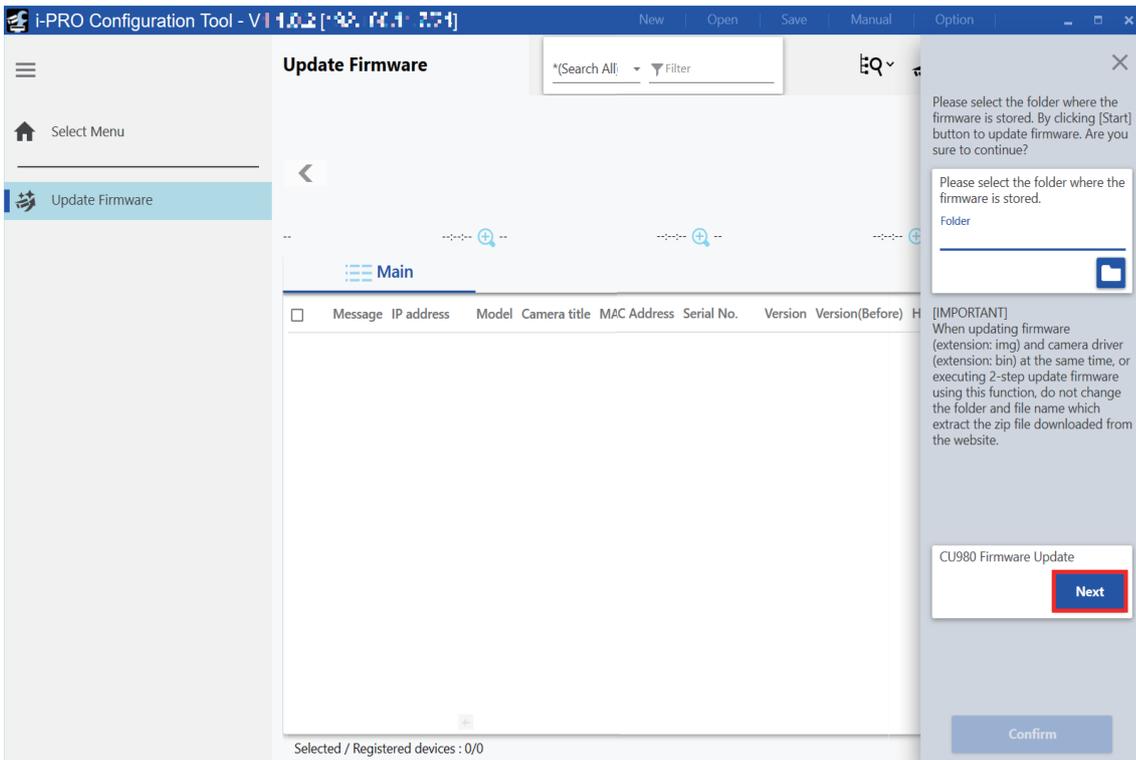

Click 'Enable the WV-CU980 firmware update operation.' in 'Update Firmware'.

Click the [OK] button.

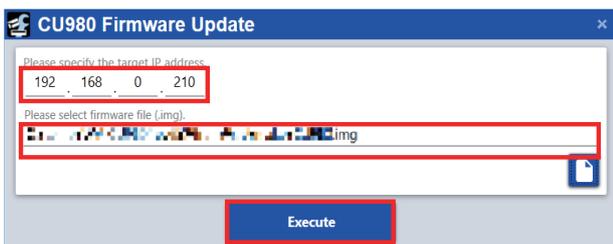

Select the 'Update Firmware'.

Click the [Next] button from 'CU980 Firmware Update'.

The 'CU980 Firmware Update' screen is displayed.

Enter the IP address of WV-CU980.

Select the WV-CU980 firmware (*.img) downloaded from the Panasonic Support website below.

https://security.panasonic.com/training_support/documentation_database/

Note

- Search for 'WV-CU980' in the [Model Number] field on the above site, and download the firmware from [Firmware] on the product page.
-

Click the [Execute] button.

IMPORTANT

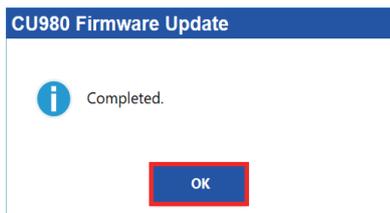

- Before clicking the [Execute] button, check that the software reception waiting screen (page 1 **S** in this manual) is displayed on the WV-CU980 display.
-

Note

- For details on how to check the IP address of WV-CU980, refer to 'Network Settings' (page 27) in the WV-CU980 Operating Instructions.
-

After the updating screen is displayed for up to 1 minute, the update completion screen is displayed.

Click the [OK] button.

If the update fails, the following error screen will be displayed.

Click the [OK] button to turn off the error screen.

Check if the PC and WV-CU980 are connected correctly, and if the IP address etc. are set correctly, and then update the firmware again.
