

Monitor images on a tablet

It is possible to connect to the camera using a tablet via the Internet and monitor images from the camera on the screen of the tablet.

For further information, refer to our website (<http://security.panasonic.com/support/info/>).

Access to "http://IP address/" or "http://Host name registered in the DDNS server/" using a tablet.

Note:

- It is necessary to configure the network settings of the tablet in advance to connect to the Internet and monitor images from the camera.
- Depending on the model of the tablet used, the screen displayed on the tablet may be the same as the screen displayed on a PC. In this case, access to "http://IP address/live/tab.html" or "http://Host name registered in the DDNS server/live/tab.html".
- There are some functions that cannot be used with a tablet. For further information, refer to our website (<http://security.panasonic.com/support/info/>).
