\*i-VMD Type2 : Intruder Detection / Loitering Detection / Direction Detection / Scene Change Detection / Object Detection / Cross Line Detection

# HD / 1,280 x 720 60 fps H.264 Network Camera featuring Super Dynamic

## Key Features

- 720p HD images up to 60 fps\*1
- Approximate 1/3 inches, high sensitivity MOS image sensor
- Maximum Screen Size is 1,980 x 1,080\* @30 fps, H.264
- \* Used by super resolution technology • Multiple H.264 (High profile) streams (max. 4 streams) and
- JPEG streams ensure simultaneous real time monitoring and high resolution recording.
- Enhanced Super Dynamic<sup>11</sup> and ABS (Adaptive Black Stretch) technologies deliver **133 dB** wider dynamic range compared to conventional cameras.
- Smart coding Technology : Group of Pictures (GOP) control function removes unnecessary information from the frame for realizing efficient encoding.
   Auto VIQS (Variable Image Quality on Specified area) function recognizes the no movement area in a video automatically and lowering the resolution of it to reduce the data size.

With the latest bit rate reducing technology, **GOP control**, **Auto VIQS**, **3D-MNR** (Multi process Noise Reduction) and **FDF** (Frequency Divided Filter), the network bandwidth and the disk space of recorder can be saved.

- High sensitivity with Day/Night(ICR\*: WV-SFN311A, Electrical: WV-SFN310A) function: WV-SFN311A: 0.01 lx (Color), 0.003 lx (B/W) at F1.6
   WV-SFN310A: 0.01 lx (Color), 0.008 lx (B/W) at F1.6
   \*ICR: IR Cut filter Removal
- New camera attachment bracket allows an **easy camera installation** toward all four directions.
- ABF (Auto Back Focus) ensures easy installation.
- VIQS (Variable Image Quality on Specified area) technology allows the designated **eight areas** to retain higher image quality while the excluded area will have a decreased image quality, which enables to use lower image file size and bit rate.
- Cropping function enables to provide whole image and the part image simultaneously. Up to 4 image capture areas can be specified, and it is also possible to control the sequence.
- Face Super Dynamic technology ensures clear face image.
- Lens distortion compensation for the distorted images can be adjusted 256 steps.
- Selectable light control modes: Outdoor scene,Indoor scene (50 Hz) / Indoor scene (60 Hz), Fix shutter Indoor scene (50 Hz/60Hz):
- Flicker caused by fluorescent lightning will be automatically compensated.
- 2x extra optical zoom at 640 x 360 resolution

- 2x, 4x digital zoom controlled by browser
- VMD (Video Motion Detection) with 4 programmable detection areas, 15 steps sensitivity level and 10 steps detection size
- Privacy Zone can mask up to 8 private areas, such as house windows and entrances/exits.
- Alarm sources including 3 terminal input, VMD and Panasonic alarm command can trigger actions such as SDXC/SDHC/SD memory recording, FTP image transfer, E-mail notification, Indication on
- Full duplex bi-directional audio allows interactive communication
- Prioritized stream control: One of the video streams can be prioritized when multiple recorders or client PCs are accessing the camera
- so that the recorder or the client PC can maintain the frame rate. • Newly developed dome cover provides clearer images above
- the horizontal. Thereby, it expands the tilting range of the lens.Face detection function detects the position of human face and
- the information is sent by XML or video stream. (Optional) • Can be added new intelligent extension software (Optional) in addition
- to built-in VMD (Video Motion Detection), alarm function.
- Fog compensation function equipped as standard.
- HLC (High Light Compensation) technology reduces strong light sources such as vehicle headlights to prevent camera being blinded.
- SCC (Super Chroma Compensation) function realizes a better color reproducibility even in low illumination.
- H.264 max. bit rate/client and Total bit rate control allows network traffic management. Frame rate priority mode controls bit rate and compression ratio to provide the specified frame rate.
- Internet mode: H.264 images can be transmitted over HTTP protocol.
- Multi-language: English / Italian / French / German / Spanish /
- Portuguese / Russian / Chinese / Japanese
  Supports SSL, DDNS (viewnetcam, RFC2136)

\*1 Super Dynamic function is automatically set off on 60 fps mode
