1. Release version: 3.10
2. Release Note Reference Number: WV-ASE231_for_Milestone-003

VER (ActiveX VER) Release Date	Priority Rank Level				Issue (Phenomenon)	Occurrence condition	Correspondence
	A	B	C	U			
1.00 Jan., '20					1st release for WV-ASF950.		
3.00 Dec., '20	U				x	-	Added search by category function to the [Alarm search] tab on the face search window. Note: Available after upgrading facial recognition server WV-ASF950 to V3.00 or later
					x	-	Added the [Quick registration] button to the [Alarm], [Alarm search], and [Face search] tabs to improve the operability.
					x	-	Added the [Suitable example] button to the "Face image Evaluation" window for the reference of applicable or not applicable images to improve the operability.
					x	-	Added alarm icons to the "Select area" window to clarify the target for alarm, regardless of detection mode (Registered face/ Unregistered face detection) to improve the visibility.
					x	-	Improved the "Face image Evaluation" window to display "Recommended width of face" and "Detectable width".
					x	-	Added scroll bar to the face search monitor so as to improve the operability on a low-resolution monitor (1280x800 or lower).
					x	-	Improved the "List of registered faces" window so that it can be moved behind other screens.
					x	-	Improved the visibility of alarm notification by displaying a frame on the face that triggered an alarm.
3.10 Jan., '21	U				x	-	Improved the face detection performance for face mask wearers when registering face images.
					x	-	Added the 90 days trial function available after the installation of WV-ASE231, without license registration and restriction.
